25X1

Dear George,

I am enclosing an outline of the problem we discussed. I am also sending you the copy of my paper and the report by [Redacted] of our Lab, both for your retention.

25X1

If this problem is not clearly enough outlined here we can discuss it at our next visit. I have included three (3) notes on a separate sheet of paper which you may or may not want to show to your mathematician. Since it would possibly be prejudicial to our approach to the expansions, I believe it wise to give you the option of not showing it to her.

Nice to see you in LeRoy's office -- will expect to see you this next week. Regards to the boys.

Sincerely,

[Redacted]
